Skills

Web Development - Office Management - Sound Engineering - Problem Solving
Computer Programming - Fine Cuisine - Financial Management - Public Relations
Technical Communication - Photography

Work Experience

Utah State University Crop Physiology Laboratory

Logan, UT

Technical Assistant

April 2021-Present

Computer vision research and various technical skills marked my time at the Crop Physiology Laboratory. In addition to doing research for the lab, I communicated with USU Extension Students and edited video lectures for a class.

USU Dining Services

Logan, UT

Various Assignments

October 2019-January 2021

My assignments taught me to work quickly, think on my feet, and communicate professionally in high-stress situations.

CWU Dining

Ellensburg, WA

Various Assignments

October 2018-July 2019

I worked my way up from the bottom and learned how to work with people from a variety of backgrounds and walks of life during my time at CWU Dining.

Bonney Lake Grocery Outlet

Bonney Lake, WA

Cashier, Department Manager

September 2016-August 2018

My time at Bonney Lake Grocery Outlet taught me to work hard and pursue the things I want in life. My duties as Department Manager included organizing inventory, monitoring sales and helping customers find solutions.

Pierce College Puyallup Office of Student Life

Puyallup, WA

Executive Director of Operations, Special Assignment

August 2015-June 2016

I worked on a wide range of projects and provided administrative assistance. I managed an advocacy campaign, revamped my department's website, and monitored several budgets. I also ran the front desk of my department on a regular basis. On Special Assignment, I was tasked with and succeeded in writing and rewriting operating manuals for the office.

Education

Utah State University

Continued Study

2019-Present. Graduating May 2022

I transferred from CWU to USU and continued working on my Bachelor's. My experience here has included work in web development, advanced algorithm design and advanced mathematics.

Central Washington University

Continued Study

2018-2019

I continued studying towards a Bachelor of Science in Computer Science at Central Washington University. My time here included courses in user interface design and testing, logic and computer programming.

Pierce College

Associate of Science, Pierce College Puyallup

2014-2016

I was homeschooled from kindergarten until 10th grade, at which point I transferred to Pierce College and graduated with my Associate's in Science focused on engineering and mathematics.
